SUMMARY

Aspiring AI/ML Engineer with hands-on experience building LLM-powered applications, recommendation systems, computer vision systems, and predictive models through internships and academic projects. Strong foundation in Python, machine learning frameworks, and API development with **1020+ LeetCode problems solved** (Rank 26,677).

TECHNICAL SKILLS

Languages: Python, SQL

ML/AI Frameworks: Scikit-learn, TensorFlow, LangChain, Langgraph, NumPy, Pandas, Matplotlib, Seaborn, OpenCV

Tools & Platforms: Git, Docker, FastAPI, VS Code, Jupyter, Power BI

Databases: PostgreSQL, MySQL, Vector Databases (ChromaDB)

Specializations: LLM Integration, Semantic Search, NLP, Deep Learning, Model Deployment, API Development

EDUCATION

Panipat Institute of Engineering and Technology

Bachelor of Technology in Computer Science (AI & ML), CGPA: 7.1/10

Panipat, India

Aug 2022 – Present

Arya Bal Bharti Public School

Higher Secondary (Non-Medical) – 93%

Panipat, India

Mar 2021 – Jun 2022

EXPERIENCE

Data Science Intern

Jul 2024 – Aug 2024

Grades Global

- Built ensemble models (Random Forest, XGBoost) achieving **91% accuracy** for business forecasting.
- Engineered data pipelines processing **500K+ records** with advanced feature engineering techniques.
- Created Power BI dashboards visualizing **40+ KPIs**, reducing analysis time by 45%.

Machine Learning Intern

Jul 2023 – Aug 2023

Imarticus Learning

- Developed ML solutions for customer churn prediction achieving **85% precision**.
- Implemented CI/CD pipelines for ML models, reducing deployment time by **40%**.
- Presented technical findings through data visualizations to senior leadership.

PROJECTS

AI Voyage Estimation & Decision System | Python, FastAPI, MCP

Nov 2025

- Developed rule-based AI for maritime voyage estimation processing **1000+ scenarios** with 92% accuracy.
- Built decision pipeline integrating weather, fuel costs, and port fees to optimize routes and **reduce costs by 18%**.
- Engineered microservices architecture with FastAPI for real-time analysis and automated decision support.

SHL Assessment Recommendation Engine | Python, LangChain, Vector DB, FastAPI

Dec 2025

- Built intelligent recommendation system using semantic search and LLM re-ranking, improving placement accuracy by **35%**.
- Implemented vector embeddings with ChromaDB for **10K+ profiles**, achieving sub-100ms query times.
- Deployed FastAPI REST API handling **100+ concurrent requests** with authentication and rate limiting.

Placement LLM – College Placement Management System | Python, LangChain, LangGraph, FastAPI, ChromaDB

Jan 2026

- Building an LLM-powered platform for college placement cells to track student profiles, placement status, and visiting company records in a centralized system.
- Designing agentic workflows using LangGraph to automate student-company matching based on eligibility criteria, CGPA filters, and skill requirements.

CERTIFICATIONS & ACHIEVEMENTS

Certifications: HTML, C++, C Training (IIT Bombay) – Power BI Basics (Udemy)

Achievements: 1020+ LeetCode problems solved – Active open-source ML contributor
